

Analytics Solution for Predictive maintenance of heat exchangers for large energy conglomerate.

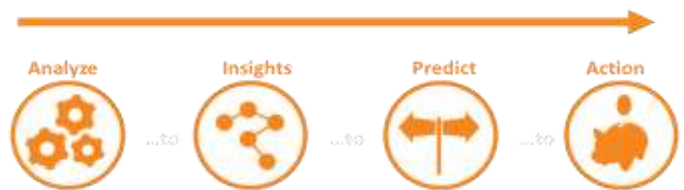

Key Benefits & Features

- Reduce downtime of the heat exchanger
- Reduce the proactive maintenance with a knowledge base
- Efficient operations for control, manage, configure

Intuceo Managed Analytics Solutions for Predictive Maintenance

- Creating knowledge base from historical events.
- Identify critical sensors control limits failure
- Identify pattern of combination of multiple sensors trends causing failures
- Operational efficiency through productionizing the knowledge base
- Early warning system for preventive breakdown of the systems
- Classification of failures by patterns
- Establish root causes for different failure
- Operation system for managing, controlling with interactive UI

The  **Predictive Analytics Platform** utilizes proprietary Data Engineering, Predictive Analytics, and Visualization solutions to solve complex Business Challenges
